Griswold Controls Introduces QuickDisc[®]

GRISWOLD CONTROLS INTRODUCES CERAMIC DISC TECHNOLOGY TO HVAC INDUSTRY

Griswold Controls is excited to announce the launch of the [QuickDisc[®] manual balance valve](#). This valve combines a traditional venturi for flow measurement with a ceramic disc never before used in the HVAC market. Ceramic discs have been used for years in the plumbing industry and are a perfect option to replace the more expensive ball valve typically used in HVAC.

Please [view this video](#) which shows the disc's movement and explains the benefits of the QuickDisc[®].

QuickDisc[®] valves are available in 1/2" and 3/4" sizes, with or without unions. This product complements the current 1/2" to 18" QuickSet[®] manual balance valve offering.
