

# Optimized Efficiency **Oe**

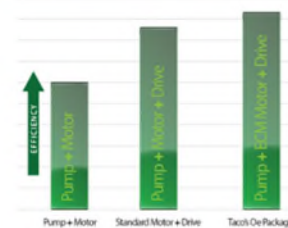

## Featuring **ECM** Technology

### Meet the Oe package!

In a push to attain the highest efficiency standards, choosing a Taco Oe package is a big step ahead. Whether you're motivated by regulatory requirements, saving the environment, or simple cost reductions, Taco's Oe package provides the widest range of high-efficiency ECM powered pumps in the industry, from 3 HP to 30 HP.

### The features you need:

- Horsepower: 3-30HP
- Speed: 1750 RPM
- Voltage: 230V/460V/60/3 useable at 208V,  
575V/60/3 available on 3-10hp,  
460V/60/3, 575V/60/3 available on 15-30hp
- Motor Enclosure: TENV on models 3-10hp,  
TEFC on models 15-30hp
- Drive Enclosures: NEMA 1, NEMA 12, NEMA 4X

### Superior performance:

- Longer service life and higher reliability
  - Increased performance with quieter and smoother operation
  - Lower maintenance costs by reducing lubrication frequency
  - Decreased operating temperature
  - Flatter motor efficiency profile than the equivalent induction motor as the speed & load decline
- A Variable Frequency Drive is required to operate the Permanent Magnet motor. The Oe package cannot be sold without a drive.

### Get started on your path to ECM high-efficiency

It's easy to configure the Oe package that's right for your application. Use our Pump Selection Tool to help you.
